

Cod. Art. :  
AV4030

### 3 sections, fixed height

Three sections couch, to be adapted for gynaecology as well.

Transformed simply by lifting the backrest or the central section through a six positions rack.

Foot/pelvis section is fixed, the central hollow allows the extraction of the basin placed under the seat section; a kind of "closing section" closes the hollow when the basin is not used.

The structure is composed by legs made of chromed tubular steel, connected to the main frame through melting of alloy.

The main frame supports the lying area, the couple of racks, the basin support and the clamps for the thighs supports as well.

The three lying areas are made of laminated panels, padded and upholstered of plastic, waterproof fabric.

The seals of the upholstery are double against tears.
