

Cod. Art. :
SL2100

Cradle fixed height on castors with Trend and reverse-Trend

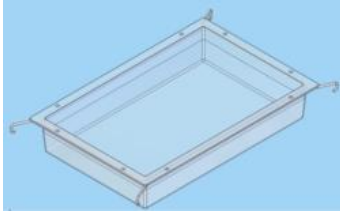

Swinging cradle with structure made of tubular steel painted with epoxy powders.
The basin is made of non-toxic material.

It is also transparent in order to monitor the baby.

Equipped with holes at the bottom for air circulation and label support.

The basement has twins wheels, two with brake and a basket for clothes and personal belongings.
It allows a movement of Trendelenburg -13° and reverse-Trendelenburg 13° (by revolving the basin).
