

Cod. Art. :  
AP4096

## Blood donor armchair with Trendelenburg

The backrest, fitted with wide curving for renal support, harmonize with seat and backrest with the continuity of the printed design. All, padded and upholstered in a soft plastic material, is contoured with anatomic curvings which avoid uncomfortable hollows.

The armrests, padded and upholstered in soft plastic material, are adjustable in all positions thanks to a special buckle with toothed sector. In addition, to allow an easy access, the armrest can be completely backwards reclined.

The movings happen by electric actuators operating by push button box placed on the armchair top.

On the central column, on the back, arrangement of support for insertion I.V. pole and basin support made of inox steel.

### Technical Details

Technical features:

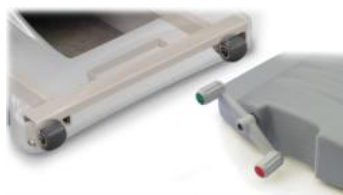

- Base and structure made of tubular and plastified steel sheet covered with ABS thermoshaped.
- Chromed steel seat frame, with chromed jointing parts.
- Protection casing under the armrests in ABS thermoformed.
- Electric Trendelenburg and reclining moving.
