Fully electric blood donor chair 'various synchro plus' padded armrests

The series armchair RELAX Givas Synchro Vario Plus is specifically for hospital use. Made with a sturdy steel frame, seat and back with support in beech plywood, upholstery foam, fire-retardant Viscoelastic thermoformed to allow maximum comfort on the prevention of pressure sores, the resting arms are upholstered in soft fabric and are adjustable, thanks to a special clamp, height, tilt, swivel and extension.

Shell base and seats ABS thermoformed to facilitate cleaning.

The movements of the back, upper and lower legs are synchronized, driven by an electric motor, driven by mobile pushbutton, with coil wire.

Complete pair of rotatable platforms with automatic brake system for the descent of the patient. At the base 4 swivel castors and 2 swivel castors with rear brake and 1 directional simultaneous.

All materials are treated with antimicrobial additive Interpon.

MOVEMENTS

Backrest and footboard are synchronized, driven by an electric motor, controlled by a pushbutton.
